

**AMENDMENTS TO THE CLAIMS**

Claims 1-10 (Canceled)

Claim 11 (Currently Amended): A binding compound comprising an antibody ~~binding site~~ or a binding fragment thereof which specifically binds to:

- a) at least 17 contiguous amino acids from the signal processed form of SEQ ID NO: 15;
- b) at least 17 contiguous amino acids from the signal processed form of SEQ ID NO: 17;
- or
- c) at least 17 contiguous amino acids from the signal processed form of SEQ ID NO: 19.

Claim 12 (Currently Amended): The binding compound of Claim 11, wherein:

- a) said binding compound ~~antibody binding site~~ is:
  - 1) immunoreactive with a polypeptide of the signal processed form of SEQ ID NO: 15;
  - 2) immunoreactive with a polypeptide of the signal processed form of SEQ ID NO: 17;
  - 3) immunoreactive with a polypeptide of the signal processed form of SEQ ID NO: 19; or
- b) said binding compound is:
  - 1) an antibody molecule;
  - 2) present in a polyclonal antiserum;
  - 3) detectably labeled;
  - 4) sterile; or
  - 5) in a buffered composition.

Claim 13 (Original): A method using the binding compound of Claim 11, comprising contacting said binding compound with a biological sample comprising an antigen, thereby forming a binding compound:antigen complex.

Claim 14 (Original): The method of Claim 13, wherein said biological sample is from a human, and wherein said binding compound is an antibody.

Claim 15 (Previously presented): A detection kit comprising said binding compound of Claim 12, and:

- a) instructional material for the use of said binding compound for said detection; or
- b) a compartment providing segregation of said binding compound from other kit reagents.

Claims 16-20 (Cancelled)

Claim 21 (Previously presented): The binding compound of claim 11, wherein the binding compound is a monoclonal antibody.

Claim 22 (Previously presented): The binding compound of claim 11, wherein the binding compound is a humanized antibody.
